

QR Menu SaaS - Restaurant Owner User Manual

Welcome to the **QR Menu SaaS** platform user manual. This guide is designed to walk restaurant owners, managers, and operational staff through the features and settings of the dashboard. By using this guide, you can successfully configure your menu, generate QR codes, set up branches, track live customer orders, and update your business profile.

Table of Contents

1. [Logging In](#)

-

1. Logging In

To access your restaurant management console:

1. Open your browser and navigate to the login URL: `http://localhost:8000/login`
2. Enter your registered email address and password.
3. Click the **Sign In** button to access the dashboard.

Control Center

Platform Admin.

Manage restaurant registrations, plans, system metrics, and billing operations from the central command dashboard.

Restaurant Operations

Approve pending accounts, manage branches, and assign roles.

Billing & Subscriptions

Configure subscription plans, track payments, and manage invoices.

System Analytics

Monitor system traffic, QR scan metrics, and platform revenue.

2. Dashboard Overview

Once logged in, you will be greeted by the **Dashboard**. This is your command center, offering a high-level overview of daily operations:

- **Key Metrics:** Instantly view Total Sales, Active Orders, Waiter Calls, and Total Products count.
- **Recent Orders Panel:** A quick-view table displaying the latest customer orders, their tables, totals, order time, and current statuses.
- **Sidebar Menu:** Grouped into logical sections to navigate your restaurant configurations easily:
 - **Operations:** Orders, Waiter Calls
 - **Menu:** Categories, Products
 - **QR Codes:** QR Codes manager
 - **Restaurant:** Branches, Staff

3. Order Management

The **Orders** page allows you to track and fulfill incoming customer orders in real-time.

- **Order Pipeline Status:** View counts of Pending, Preparing, and Ready orders for today.
- **Filters:** Search by Order ID or Table, and filter by order status (e.g. Pending, Preparing, Ready, Cancelled) to manage high volume periods.
- **Fulfillment:** Update an order status directly (e.g. change a new order from *Pending* to *Preparing*, or mark it as *Ready* for serving).

4. Waiter Calls & Options

Waiter Calls

Customers can call a waiter or request services directly from their digital menus. The **Waiter Calls** section displays these requests in real-time.

- Staff can mark a call as **Seen** to acknowledge it or **Resolve** it once the customer has been served.

Custom Call Options

Under the **Call Options** sub-tab, you can create custom choices for customer requests (e.g., "Request Bill", "Request Water", "Call Waiter").

- You can assign an emoji icon to each call option, set its status to Active/Inactive, or delete options no longer needed.

5. Menu Categories

A structured menu starts with categories (e.g., Appetizers, Main Course, Drinks, Desserts).

Categories List

Displays your active categories, the number of products assigned to each category, their sorting order (priority in the digital menu), and options to edit or delete them.

Creating/Editing a Category

Click **Add Category** to create a new category. Provide a Name, sort order, toggle active status, and upload an illustrative category image using the drag-and-drop file uploader.

6. Menu Products & Options

Products List

Displays all items currently on your menu.

- Each product displays its Image, Name, Category, Price, and Availability toggle.
- You can turn on/off availability instantly if an item runs out.
- The top banner keeps track of your package product limits (e.g. *0 / 10 products created*).

Creating/Editing a Product

Click **Add Product** to define a new menu item. You can set:

- **Product Details:** Name, Category selection, and description.
- **Image:** Upload an appealing photo of the dish.
- **Pricing:** Define base price and discount price (optional).
- **Variants/Options:** Configure options (e.g., size options like Small/Large, extra toppings, or drinks options).
- **Status:** Toggle to make it active or mark it as available/unavailable.

7. QR Code Generation

The platform features an automated QR generator to route customers to your digital menu or specific tables.

QR Codes List

This page tracks your created QR codes, showing how many times each code has been scanned, and lists download/print shortcuts.

Generating a QR Code

Click **Generate QR Code** to build new codes. You can select:

- **Restaurant Menu:** Generates a general menu link.
- **Branch Specific:** Link points directly to a particular branch menu.
- **Table Specific:** Link maps directly to a specific table in a branch. When scanned, it automatically identifies the table number for waiter calls and ordering!

8. Branches Setup

If your restaurant has multiple outlets, you can manage them all under the **Branches** section.

Branches List

Shows all active locations, the count of tables set up in each branch, and links to edit branch details.

Adding a Branch

Click **Add Branch** and fill in the Branch Name, Address, and contact phone number to register a new outlet.

9. Profile & Restaurant Configuration

Under the Profile tab, you can manage personal and business information. This is divided into five tabs:

9.1 Personal Info

Update your own admin user profile details: Name, phone number, email address, and profile avatar.

The screenshot shows the 'Profile & Settings' interface with the 'Personal Info' tab selected. The left sidebar contains navigation links: QR Menu, Dashboard, OPERATIONS (Orders, Waiter Calls), MENU (Categories, Products), QR CODES (QR Codes), and a user profile for Adeel Ahmed. The main content area has tabs for Personal Info, Password, Restaurant Profile, Opening Hours, and Social Links. The 'Personal Information' section includes a profile picture placeholder with a 'Change Photo' button, and input fields for 'FULL NAME *' (Adeel Ahmed), 'PHONE' (+92 300 0000000), and 'EMAIL ADDRESS *' (student1446855@gmail.com). A 'Save Personal Info' button is at the bottom.

9.2 Password Update

Change your portal password by entering the current password and your new secure password.

The screenshot shows the 'Profile & Settings' interface with the 'Password' tab selected. The left sidebar is identical to the previous screenshot. The main content area has the 'Change Password' section, which includes a note: 'Use a strong password with at least 8 characters'. It features three input fields: 'CURRENT PASSWORD *' (placeholder: Enter current password), 'NEW PASSWORD *' (placeholder: Min 8 characters), and 'CONFIRM NEW PASSWORD *' (placeholder: Re-enter new password). An 'Update Password' button is located at the bottom.

9.3 Restaurant Profile Settings

Define settings that shape the customer-facing menu website:

- **Branding:** Upload a logo and cover image for your restaurant.
- **Toggles:** Enable or disable **Online Ordering** or **Waiter Calls**.
- **Payment Config:** Input your JazzCash, Easypaisa, or WhatsApp Order phone numbers. Customers can pay online, and orders will sync with these details.

9.5 Social Links

Add links to your restaurant's WhatsApp number, Instagram, and Facebook profiles. These display as clickable icons on the digital menu footer.

10. Customer Experience Preview

When customers scan the generated QR code at their table, they see the fully responsive public menu on their mobile devices.

- **Top Branding:** Displays the restaurant name, description, cover photo, and logo.
- **Category Filter:** Tap-to-filter categories to quickly browse drinks, mains, etc.
- **Dish Cards:** Clean display of dish pictures, pricing, and ingredients.
- **Interactive Widgets:** Includes a floating call waiter button (??) and a bottom navigation menu.
